CORROSION RESISTANCE: Water System Lining

CHEMTHANE 4200PW is a spray-applied coating designed for lining potable water systems, including pipes and steel and ductile iron tanks. The solvent-free, two-component lining is applied to prepared steel, iron or concrete without the need for a primer, curing in only six to eight minutes. The lining is ready to resist corrosion from water after just a single coating, and is chemical and temperature resistant. **Chemline Inc.;** 314-664-2230; www.chemline.net

Wireless Inspection: Durable RFID Tags For Pipes

The SmartMark RFID tag attaches to a pipe via a rubber loop that is secured with cable ties. The RFID tag can hold up to 200 characters of text, and has a wireless read range of up to 15 ft, simplifying inspections. The tag is chemical and temperature resistant, and the rubber shield protects against impacts. As a result the SmartMark RFID tag has an expected service life of up to 10 years. **William Frick & Co.;** 847-918-3700; www.fricknet.com

Info Box

Select the product information you want and contact the manufacturer at either the Website or phone number provided.
